

The previous owners added the copper awning. Over time, it has developed a rich patina.

These oversize wood rockers are the family's go-to spot for catching up.

About Our House

BUILT IN: 1939

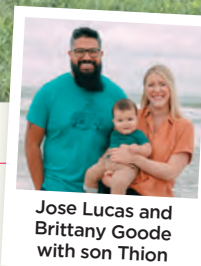

BOUGHT IN: 2017 for \$265,000

SIZE: 1,129 sq. ft.

THE LOOK: We're history and architecture buffs, so we kept as many of the 1930s details as we could, like the stained-glass window next to the door.

FAVORITE FEATURE: Our real estate agent told us the mismatched bricks had originally been discarded because of scorch marks. They're actually very valuable—we get letters from people wanting to buy them!

DIY WIN: The door looks original, but it came from a local salvage store. We had to sand and repaint it; we chose this shade of green because it complements the bricks.
